

Develop a Competitive Research Proposal

Research Design and Biostatistical Considerations

What?

This program will equip researchers with the tools to:

- Develop and refine competitive research proposals.
- Design and prepare a research study and analysis plan.
- Think through the biostatistical and research design considerations of grant applications.
- Receive mentorship and guidance throughout the grant application process.

Who?

Junior faculty seeking independent research careers, who are looking for statistical support, project mentorship, and application guidance.

Applicants who are actively developing a grant proposal for submission following the training program are especially encouraged to apply.

When?

Nine sessions between January and May 2027.

Apply by November 20, 2026
