Engaging Techniques for Teaching Students & Scholars How to Read Scientific Papers

[Dr. Katherine Guevara](#)

[Dr. Leonardo Morsut](#)

This 60-minute interactive is based on a unique USC Keck School of Medicine course for undergraduates, grad students, and PhDs enrolled together and taught by Dr. Leonardo Morsut. Workshop facilitators, including Dr. Morsut, present common reasons why reading research can be so challenging (even for advanced students) and model effective techniques for helping students and scholars practice this skill in more engaging ways.

Learning Objectives: By the end of this workshop, participants will be able to:

- Identify reasons why students/scholars struggle with scientific papers
- Apply provided engagement strategies to our own teaching
- Plan updates for how we teach scientific papers

Date: Wednesday, November 10, 2021

Time: 12p – 1pm PDT
