# Introduction to NIH Data Repositories

Learn about how you can use these free-to-access, national medical record databases for your research!

The All of Us (AoU) Research Hub contains medical records, genomic data, health surveys and more from 500,000+ participants.

The National COVID Cohort Collaborative (N3C) contains medical records from 22 million+ patients across 84 institutions.

**For each data repository, learn about:**

- The purpose and scope of the repository
- Steps to initiate a research project
- Tools available for data set curation, analysis, and publication

**Tuesday, May 13<sup>th</sup>, 2025**

**11:00 am - 12:00 pm PST**

**Via Zoom**
