

SC CTSI Regulatory Science student research team presents Translational Science-focused poster at annual meetings

University of Southern California • Children's Hospital Los Angeles

Fast Track

Fast track is a process designed to facilitate the development, and expedite the review of drugs to treat serious conditions and fill an unmet medical need.

Breakthrough Therapy

A process designed to expedite the development and review of drugs which may demonstrate substantial improvement over available therapy.

[Breakthrough Therapy](#)

Accelerated Approval

These regulations allowed drugs for serious conditions that filled an unmet medical need to be approved based on a surrogate endpoint.
