

Seminar Series: Ethics by Design: Restorative Neuroscience and Technology

Join Dr. Charles Liu and Dr. Sabrina Derrington for a timely conversation on the ethical challenges shaping emerging neurotechnologies. This session explores how scientific–ethical partnerships can strengthen research design and ensure responsible innovation.

Following this event, you will be able to:

- Identify 2 or more ethical considerations relevant to neuromodulatory technologies and interventions
- Describe at least 1 ethical tension in translating neurorestorative research from pre-clinical to clinical research

Location: Via Zoom

**Sabrina Derrington,
MD, MA, HEC-C**
SC CTSI Director of
Research Ethics
