

*Translating Science into Solutions for Better Health*

## Seminar Series: Electronic Health Records (EHR)

### *Unlocking the Power of EHR Data for Research*

Are you looking to accelerate your research with real-world patient data?

Join us for an engaging seminar that demystifies the EHR data discovery tools available to USC researchers, and shows you exactly how to put them to work.

During this 60-minute session, you'll explore powerful tools designed to help you identify and explore patient cohorts, assess study feasibility, and build a stronger foundation for data-driven research.

### Following this event, you will be able to:

- Identify the functions and capabilities of USC's EHR data discovery tools in the context of clinical and translational research
- Assess which tool or request pathway is best suited to specific research objectives involving cohort identification, feasibility queries, and dataset access

**Location: Via Zoom**

**Dario Kuzmanović, MHS, CHPC, CHRC**

Program Director of Data Science, SC CTSI

**Daniella Garofalo, MPA**

Program Manager, Clinical Research Informatics, SC CTSI

**DATE & TIME:**

**April 30, 2026**

**12:00 - 1:00 pm PST**
