

Digital Scholar Webinar

HIV and STI Protection through UBESAFE: Geofencing, Contextualized Messages, and Gamification

About the Webinar

Join our 60-min webinar on UBESAFE app: Learn smartphone alerts based on context, gamification for engagement. For MSM, it values privacy, tested in Barcelona by Dr. Felipe A. Besoain-Pino with support from the Public Health Agency.

Learning Objectives

- By the end of this webinar, participants will be able to:
- Select the pertinent sensors in smartphones for data collection.
 - Balance the requirements of the target users and professionals to create a successful app.
 - Plan the development process for the app, ensuring the inclusion of target users from the initial stages.
