

Subject - Pre-Screening

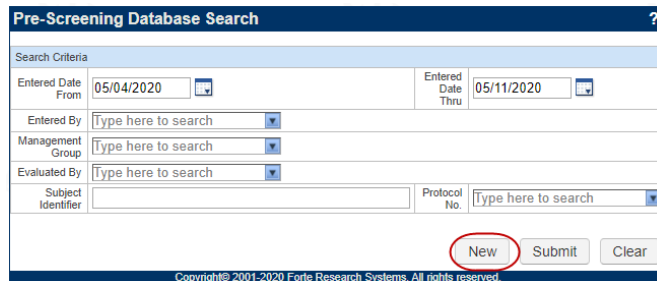

OnCore supplies a way to track pre-screening efforts for potential subjects and the time spent pre-screening these candidates. The information captured includes subject referral data, subject characteristics data and protocol evaluation specifics.

Create a Screening Record

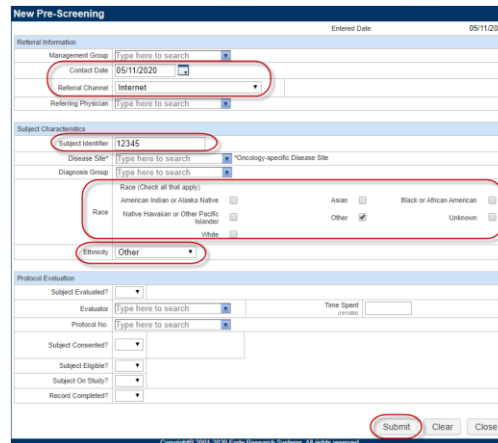

1. Navigate to Subjects -> Pre-Screening

2. Click New

3. Enter Contact Date
4. Select Referral Channel from the drop-down
5. Enter Subject Identifier
6. Select a Race
7. Select Ethnicity from the drop-down
8. Click Submit

Subject - Pre-Screening

Add Pre-Screening Subject to a Protocol

After the potential subject has been evaluated, you can enter evaluation data in the bottom portion of the screen.

1. Select Subject Evaluated Yes or No
2. Search for Evaluator from the drop-down
3. Select Protocol No from the drop-down
4. Select Subject Consented Yes or No
5. Click Submit

6. Clicking Register Subject, you are transferred to the Register Subject page. You can then add a new subject to the protocol.
